

MMAI Medicaid Claims Paying Incorrectly

Date of notice: 8/29/24

Meridian has identified an error made to the system on 7/25/2024 resulting in MMAI Medicaid claims potentially not paying correctly. This issue is not impacting all MMAI Medicaid claims and is in the process of being corrected. Claims were not consistently using the HFS Medicaid fee schedule to determine if the member co-insurance amount from the Medicare claim is reimbursable on the Medicaid claims. As a reminder, for most MMAI Medicaid claims, the 20% co-insurance from the Medicare claim is only payable on the Medicaid claim if the HFS fee schedule exceeds the amount paid on the Medicare claim. If no additional payment is due on the Medicaid claim, the claim will pay \$0 (EXMX). The system is using 25% of billed charges, rather than the HFS fee schedule to determine payment amount on the Medicaid claim. This may have resulted in the MMAI Medicaid claim being over or under paid. All claims impacted will be reprocessed with no further action by the provider, crossover claims.
